

The Original Fluff Food Safety Absorbent

Featuring a highly absorbent fluff core, the legendary Dri-Loc® food safety absorbent offers advanced moisture control technology that enhances the shelf appeal of packaged fresh food.

NOVIPAX™

IMPROVE CONSUMER SATISFACTION ONE PACKAGE AT A TIME

Dri-Loc food safety absorbents offer fresh food retailers and processors a convenient way to enhance product shelf appeal and improve overall consumer satisfaction.

The sealed pouch pad features a highly absorbent fluff core that is designed to attract and trap excess juices. The result is a drier package that stays fresher throughout the distribution, merchandising and purchasing cycle.

The highly absorbent virgin fluff core is sourced from Forest Stewardship Council® (FSC) certified suppliers, ensuring that the world's natural resources are conserved and sustained.

Dri-Loc food safety absorbents are available in a range of sizes, colors, shapes and absorbencies that are ideal for your particular packaging environment.

Dri-Loc is also available with FDA-compliant super absorbents for extremely high absorbency applications.

Consumers prefer fresh protein packages with a food safety absorbent, recognizing that the pad controls excess fluids, protects against leaking packages and helps keep perishable foods cleaner and fresher looking.

A Superior Food Safety Absorbent

The leading grocery retailers and food processors trust Dri-Loc to deliver several important features and benefits:

- Pouch pad, sealed on all four sides
- Dynamic fluff core traps fluid inside
- Increases product shelf appeal
- Reduces costly and time consuming re-wrapping of packages
- Superior performance in case-ready and modified atmosphere applications
- Approved for food contact by the USDA and FDA
- Absorbent fluff core is biodegradable and compostable
- Available in a variety of sizes, colors, shapes and absorbencies
- Available in cases or rolls
